DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-7 are rejected under 35 U.S.C. 102 (b) as being anticipated by Mumick et al. (6,006,107).

As per Claim 1.

Mumick discloses:

comparing said fixed interest rate with a time- varying market interest rate (market interest rate), see column 6, lines 33-34, column 4, lines 19-20, and column 2, lines 29-30.

computing an acceptable amount of loan payoff dependently on the difference between said market interest rate (current interest rate) and said fixed interest rate, see column 2, lines 36-41.

whereby a payoff amount (discounted prepayment) is smaller than the principal balance of the loan, the difference between loan balance and payoff amount comprising a loan discount that is offered to the borrower, see column 1, lines 63-64, 67-69.

As per Claim 5

Mumick discloses:

Art Unit: 3609

comparing the outstanding balance of the loan with the time-varying value that the loan obligation would fetch in the secondary market, see column 6, lines 33-34, column 4, lines 19-20

computing an acceptable amount of loan payoff dependently on the difference between said principal balance and said price, see column 2, lines 36-41, and column 6, lines 3-12

whereby a payoff amount (discounted prepayment) is smaller than the principal balance of the loan, the difference between loan balance and payoff amount comprising a loan discount that is offered to the borrower, see column 1, lines 63-64, 67-69.

As per Claim 2, 6

Mumick further discloses:

borrower prepays full or partial principal amount of debt at a discount, directly to the lender that holds the mortgage obligation, see column 3, lines 43-47. (Loan holder perform process for those customer accounts implies that repayment is paid directly to the loan holder/lender)

As per Claim 3, 7

Mumick further discloses:

third party acquires a mortgage loan from the current lender at the price prevailing in the secondary market for such loans, and then offers the borrower to prepay, in part or in full, principal amount of loan at a discount, see column 8 lines 39-42. (Lender charges third party greater interest rate/ current market interest, allowing borrower the option of repayment discount)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject

Art Unit: 3609

matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4,8 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Mumick (6,006,107) in view of Descloux (U.S. 2004/0128232)

Mumick ('107) teaches that third party offers borrowers to prepay, in part or in full, principal amount of loan at a discount. However, Mumick does not specifically disclose third party acquires the portfolio of mortgage loans which display a statistically meaningful tendency of borrowers to repay their loan.

Descloux ('232) teaches acquiring the portfolio of mortgage loans which display a statistically meaningful tendency of borrowers to repay their loan (forecasting loan prepayments), see paragraph 0054, lines 8-12.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Mumick ('107) to include acquiring the portfolio of mortgage loans for the benefit of seeking out borrowers willing to repay.
